Scott Villa Teaching BIO 330 Undergraduate Parasitology Lecture sec: 2 2020 Fall

Text Responses

Students often feel strongly about a particular aspect of a course. Please share any comments about the course.

I really enjoyed this course. I liked the optional Fridays because being on zoom every day is not fun. I also liked the structure of the assignments because it gave time to show what you know over the traditional test.

I absolutely loved this course. Dr. Villa is hands down one of my favorite professors that I have ever had at Spelman College. The course has a ton of information to learn and comprehend, but everything is extremely interesting. Even when I thought the assignments were tedious, I still feel like I learned a lot from them.

I think if there's one thing I would commend Dr. Villa for, it is that he knew what he was talking about. If he didn't now, he would say, "I don't know," which I appreciated. I don't expect him to know everything about EVERY parasite. I have come across some professors who will....pretend that they know the answer or get a little angry that someone dared to ask something outside of their knowledge (this is only a select few). I felt respected in this class and like we were learning new things together. I also felt that no answer I asked was a stupid question. I appreciate this aspect of the class.

Loved the course, challenging but reasonable

The course overall was challenging and interesting at the same time. The exams were hard, but I enjoyed being in class.

I absolutely loved this course! I always came to class with excitement and was already ready to learn.

Identify a particular book, reading, or activity you really liked or disliked. Explain why.

I really like the create a parasite activity. It was a good way to learn about parasites but also fun and creative.

My favorite activity was the final project. It was so much fun to make and it was a nice "break" in between ending the class and starting to study for finals.

I liked the book chapters when they were assigned!

I really liked the assignment when we had to find a parasite in a tv show or movie and fact check it

At the start of the semester, we read a book called Parasite Rex which was very interesting and helped me with assignments to turn them in.

I really liked the final project that we had to do. It brought out my creative side (that I don't really have) and it was fun to work with others. I also enjoyed watching what the other groups came up with.

Suggest how the course format, materials, presentation or the syllabus might be revised to facilitate your learning.

Only thing I would change is making class recordings available. I understand the reasoning behind not posting them, but it would have been nice to have them especially for studying for the final. I also wished we had more time to do some of the assignments. Most of the time the timing was perfect but some of the test and the final project, I wish I had more time to complete.

N/A

Maybe more time given one exams! I know for the first exam, we had a the same time allotted as we would a quiz, and I wish I had at least a day or two extra ?? However, for the past exam, we had a week, so I was thankful Also, maybe put the recordings of the videos o Moodle? I know that Dr. Villa said he was against that, but I really think it would help to refer and go back to. Also, my wiFi really acted up for a month, so it would be great to have a reference. However, I understand if this cannot be done!

in person would be lovely

The syllabus was super clear and helpful to warn us what we were going to learn each day in class.

I wouldn't change anything. I liked the way the course was set up and it made learning easier.m

Recording the zoom lectures and having them posted on the Moodle page would be very helpful

Indicate how the text, assigned readings or activities help promote your understanding of the course content.

The book was a easy to read and interesting and nicely integrated the information we needed to know in a simple way.

All of the writing assignments really helped to understand the material because to do well on the various papers you had to use extreme detail.

all assignments were relevant and relatable to the real world, no busy work, everything had a prupose

All activities prepared us for presentations and writing assignments, so it all worked well together.

Having the lecture notes available to me really helped me through this course. Anytime I was lost I could go back to the day of the lecture, find the notes and re-read what I did not understand. The lecture notes were also simple and straight forward which I appreciated.

The assignments required you to apply the information taught during lecture but in an engaging way. The assignments were different every time and I appreciate that

What City, State are you located at time of completing evaluations?

San Francisco, California

Hartford, Connecticut
